Front-End Developer

Summary

Over the last 5 years, I have developed a wide range of websites using HTML, CSS, Javascript, jQuery, Bootstrap, Sass, Vue.js, React.js, Git, PHP, MySQL and PSD for mock-ups including sites for startup companies and businesses. My core competency lies in complete end to end management of a new website development project, and I am seeking opportunities to build websites from the ground up for your business or for you web presence.
